

## COMPANY NEWS

### 4-5 December 2008 - 2<sup>nd</sup> Philippine Solid and Hazardous Waste Management Summit

The event's theme, **"Waste Management and Climate Change: Links and Challenges"**, was chosen to raise awareness and stress the relationship of waste management and climate change. The organizer, Cebu Link Management Services, prepared the 2-day summit with technical programs that featured topics and speakers on environmental laws, policies, current projects, technical solutions, best practices and studies.

It was of great honor that **JM Ecotech Solutions Co** was not just invited as participant of the event but also requested to present our technology on the growing demand for cost-effective waste water treatment solutions. The presentation was formally made by our General Manager, **Ms. Jenny Chua**, and was attended by environmental enthusiasts from different LGU's, NGO's, as well as, representatives from private companies.

Participation to the recently held conference was a very enriching experience for Ecotech delegates. The company will continue to support and contribute to similar activities and projects that are geared toward environmental information campaign, care and protection.
